Important Notice for Customers

ILMs are authored and developed in English and then translated into French by a professional translation consortium. The translation process takes time and requires careful attention to all elements of an ILM, including graphics and other visual content. As a result, not all modules are translated at the same time.

Many French-language modules may therefore be **one or more versions behind the current English edition** and may contain significant differences in content.

Publishing Overview

ILM published **13 newly translated French-language modules** through its partnership with the French Consortium.

Program (Click programs below to jump to module details)	Modules Published
→ Charpenterie (Carpenter)	5
→ Entretien et réparation d'équipement lourd (Heavy Equipment Technician)	5
→ Mécanique industrielle (Industrial Mechanic/Millwright)	3
