

Sheet Metal Worker Publishing Notes 2022-23

All Sheet Metal Worker ILMs are currently being reviewed in preparation for an extensive content update project. All outstanding content updates and maintenance items will be addressed as part of this upcoming development project. As a result, there are no updates to the English Sheet Metal Worker ILMs for this year. The ILM office will share more information regarding the upcoming project once it moves from the Planning phase to the Development phase.

All-Trades Product Update

Due to changes resulting from the new [Skilled Trades and Apprenticeship Education Act](#), the content within **Alberta's Industry Network** and **Apprenticeship Training Program** modules, are no longer valid. When the provincial apprenticeship system changes are final, these products will be updated accordingly. Until then, they are not available to order.

Please continue submitting your feedback and comments on Sheet Metal Worker ILM content. For more information on the ILM Comments and QA Maintenance process, please visit our website:
