Revisions  
(production and  
errata only; staged  
release – timing TBA))

*This schedule provides **estimated release windows** for new and updated materials to support program planning and ordering. Timelines reflect current production forecasts and may shift if additional development, quality assurance, or curriculum review is required. Official publication announcements will confirm when materials are available to order.*

*Please consider internal ordering deadlines and print lead times when planning upcoming intakes. We're here to support your adoption plans when ready.*

## AN INSIDE LOOK

### Leveling Up Accessibility!

ILM is celebrating the completion of our updated style guide, which includes important updates to our modules that will improve accessibility for our students. These updates are designed to make our modules clearer, more

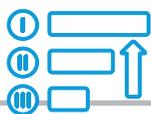

navigable, and more accessible for every learner. Alongside stronger structural standards and more consistent formatting across all materials, we've transitioned to Aptos (sans serif) and Georgia (serif)—a pairing selected

for strong legibility in both print and digital environments. With more open letterforms, improved hierarchy, and a clearer visual framework, these updates help students locate key information quickly, reduce visual strain, and engage with their coursework with fewer barriers.

<b>Aptos</b>	<b>Georgia</b>

Here is some body text

## PRIORITY HIGHLIGHT

### Committing to a More Responsive Maintenance Cycle

Our team is dedicated to continuous improvement, and we have stepped up our game in responding to critical feedback for the benefit of the learners and instructors we serve.

This is an inside look at our newly refined process.

#### FEEDBACK RECEIVED

Through our website, previews, emails, outreach

#### TRIAGED

Feedback reviewed and triaged for impact to learning experience, type of edit, and resolution complexity

#### RESOLUTION

Feedback immediately implemented and print files updated

#### FUTURE REVISIONS

Lower priority items banked for next release cycle

## UPCOMING EVENTS

### Build Her Up Conference

This event focuses on supporting and advancing women in the skilled trades through connection, learning, and industry dialogue. For our trades publishing team, it's a valuable opportunity to hear directly from the field and keep our learning resources aligned with real workforce needs.

Find more information about the event [here](#).

**When:** March 5, 2026, 9 am – 5 pm

**Where:** NAIT Productivity and Innovation Centre, Princess Elizabeth Ave NW, Edmonton, AB, Canada

**Cost:** Free

### Skills Alberta

Skills Alberta's competitions give high school and post-secondary students the chance to test their abilities, showcase their talents, and connect with employers and educators—all while advancing career pathways in many areas including carpentry, welding, electrical, and more than 40 other skill areas.

The Provincial Skills Canada Competition is the flagship event on the calendar, bringing together Alberta's top competitors as they demonstrate excellence in real-world trade and technology challenges.

Find and register for specific event categories [here](#).

Know of an event we should highlight next? We'd love to hear from you!
